

***Assignment 2: Daily Standup Simulation** – Write a script for a Daily Standup meeting for a development team working on Calculator application. Address a common and incorporate a solution into the communication flow.*

## **Daily Standup Meeting Script**

Date: [Today's Date]

Time: [10:00 AM]

Duration: [20 minutes]

### **Attendees:**

1. Scrum Master
2. Team member 1
3. Team member 2
4. Team member 3

**Scrum Master:** Good morning, everyone. Let's begin our daily standup meeting.

**Team Member 1:** I'll start. Yesterday, I completed the implementation of addition and subtraction functionalities for the calculator application. However, I encountered a challenge with handling negative numbers in subtraction calculations.

**Scrum Master:** Thank you for bringing that up. Negative numbers can indeed be tricky. Have you had a chance to discuss this with the team or find any potential solutions?

**Team Member 1:** Yes, I've discussed it with Team Member 2, and we've come up with a solution to address this issue by implementing a validation check for negative results in subtraction calculations.

**Scrum Master:** That sounds like a solid plan. Let's make sure to document this solution and implement it as soon as possible. Is there anything blocking you from proceeding with this task?

**Team Member 1:** No, I have all the resources I need to proceed. I'll start working on the solution right after this meeting.

**Scrum Master:** Great, thank you for the update. Team Member 2, how about you?

**Team Member 2:** Yesterday, I worked on implementing the multiplication functionality. I encountered some challenges with handling large numbers, but I was able to find a workaround by optimizing the algorithm.

**Scrum Master:** Excellent work on finding a workaround. It's crucial to optimize our algorithms for efficiency. Does anyone else anticipate facing similar challenges in their tasks today?

**Team Member 3:** I'm currently working on the user interface design for the calculator application. While it's not a technical challenge, I'm struggling with aligning the design with the team's vision.

**Scrum Master:** Thank you for sharing that. It's essential to ensure that the user interface aligns with our overall vision for the application. I suggest scheduling a brief design review session with the team to gather feedback and ensure alignment. Would you like assistance with that?

**Team Member 3:** Yes, that would be helpful. I'll reach out to the team to schedule the review session.

**Scrum Master:** Perfect. Let's make sure to address any design concerns and iterate as needed to achieve our desired outcome.

In conclusion, it's great to see everyone actively addressing challenges and finding solutions collaboratively. Let's continue to communicate and support each other as we work towards completing the calculator application feature. If there are any additional challenges or blockers, feel free to reach out to the team for assistance.

**Meeting adjourned. Thank you, everyone.**
